

202A EGG WASHER

Features

- ◆ Made of strong stainless steel for great durability and hygiene.
- ◆ ZENYER 202A egg washer is combination of modular 602 vacuum egg lifter, the 605A accumulator, the 202A main machine and optional egg printer and manual collection conveyor with capacity of 10000 eggs/hour.
- ◆ Eggs are vacuum lifted and loaded onto the 605A accumulator by using the 602 vacuum egg lifter. 6 rows LED lights are added under the accumulator and workers can pick out any cracked, dirty or any unqualified eggs through the LED lights. The LED candling booth equips with candling cover and mirror as well to reinforce the candling result. The accumulator will direct 6 lines of eggs into 1 line and transport them to the single loading unit of egg washer.
- ◆ The sanitizer sprayer sprays sanitizer or detergent (customer provides) onto eggs automatically for food security purpose. The eggs are cleaned by brushes with warm water (customer provides water heater).
- ◆ Water on eggs will be swept off by the drying brushes, meanwhile the eggs themselves are dried by the drying fan system. The drying rate can reach up to 95% depending on the environmental humidity.
- ◆ Connect with ZENYER 104A/104B egg grader main machine to build ZENYER 302A/302AS egg processing line with capacity of 10000 eggs/hour.

Option:

Model	ZYX-JS1-3
Product code	202A
Capacity	10,000 eggs/hour
Power	10.8kw,50HZ
Voltage*	380V-415V,3-phase
Dimension (L*W*H)	7.8*2.8*2 M
Net weight	800 kg
Gross weight	1350 kg
Function	Vacuum egg lifter, accumulator, candling booth, sanitizer sprayer, washing, drying and optional egg printer and manual collection conveyor
