

202B EGG WASHER

Features

- ◆ Made of strong stainless steel for great durability and hygiene.
- ◆ Suitable for pre-washing before separating chicken eggs or cleaning and drying duck eggs.
- ◆ Includes water bath loading, washing, drying, candling, and an optional manual collection conveyor with a capacity of 10000 eggs/hour.
- ◆ Pour the whole tray or box of eggs into a water bath and the eggs will be transported into washing system through the conveyor. This loading method not only saves time but also minimizes egg cracks by using buoyancy. Plus, eggs are easier to wash as well after running through a water bath.
- ◆ The eggs will be cleaned by brushes and warm water (customer provides water heater).
- ◆ Water on eggs will be swept off by the drying brushes, meanwhile the eggs themselves are dried by the drying fan system. The drying rate can reach up to 99% depending on the environmental humidity.
- ◆ Can be connected with the ZENYER 104B egg grader main machine to set up the ZENYER 302BS egg processing line with a capacity of 10000 eggs/hour.
Can be connected with the ZENYER 501B egg separator to set up a liquid egg processing line with a capacity of 8000 eggs/hour.
