

203B EGG WASHER

Features

- ◆ Made of strong stainless steel for great durability and hygiene.
- ◆ Includes water bath with double lines loading, washing, drying, candling, and optional manual collection conveyor with a capacity of 20000 eggs/hour.
- ◆ Suitable for pre-washing before separating chicken eggs or cleaning and drying duck eggs.
- ◆ Pour the whole tray or box of eggs into the water bath and the eggs will be transported into the double line washing system through the conveyors. This loading method not only saves time but also minimizes egg cracks by using buoyancy. Plus, eggs are easier to wash as well after running through a water bath.
- ◆ The eggs will be cleaned by brushes and warm water (customer provides water heater).
- ◆ Water on eggs will be swept off by the drying brushes, meanwhile the eggs themselves are dried by the drying fan system. The drying rate can reach up to 99% depending on the environmental humidity.
- ◆ Connecting with the ZENYER 107 egg grader main machine to set up the ZENYER 303B egg processing line with a capacity of 20000 eggs/hour.
- ◆ Connecting with the ZENYER 502B egg separator to set up a liquid egg processing line with a capacity of 20000 eggs/hour.

Product code	203B
Model	ZYX-YS2-3-(P)
Capacity	20,000 eggs/hour
Material	Stainless steel
Power	21.37 KW, 50 HZ
Voltage*	380V-415V,3-phase
Dimension (L*W*H)	12.3*2.3*1.1 M
Net weight	950 kg
Gross weight	1550 kg
Function	Water bath with double line loading, washing, drying, candling, and optional manual collection conveyor.
